FATIH KARACA

BACKEND SOFTWARE ENGINEER

Espoo, Finland | karacaafatih@gmail.com | +358 46 9449777 | fathkrc.dev | github.com/Fathkrc | linkedin.com/in/fathkrc/

PROFESSIONAL SUMMARY

Backend Software Engineer with hands-on experience developing enterprise Java applications and modern backend services using Spring Boot. Contributed to the modernization of a legacy JSP-based ERP application by implementing backend functionality during its migration to a Spring Boot microservice architecture. Passionate about backend engineering, distributed systems, and building clean, maintainable software. Currently studying Software Engineering at Hive Helsinki while continuously expanding my expertise through personal projects and modern backend technologies.

TECHNICAL SKILLS

Languages

Java, Go, JavaScript, Scala, SQL

Backend

Spring Boot, Spring Data JPA, REST APIs, Node.js, Microservices

Tools

Maven, Docker, Git, GitHub, Jira, Swagger/OpenAPI, Linux

Technologies

PostgreSQL MongoDB , Apache Kafka

EXPERIENCE

Java Backend Developer **Jan-Nov 2022**

Aura GmbH

- Contributed to the modernization of a legacy JSP-based ERP application by implementing backend functionality during its migration to a Spring Boot microservice architecture.
- Developed backend functionality for the legal module, including debt collection, court cases, hearings, lawyer assignments, and related business entities.
- Implemented custom Spring Data JPA queries involving complex joins across highly relational legal and financial data models where derived repository methods were insufficient.
- Worked in an Agile development environment using Maven, GitHub, Jira, and Swagger/OpenAPI while collaborating within an international software team.

Software Engineering Intern **Nov 2024**

Aistico Oy

- Configured and maintained a macOS development environment for an embedded C application generated with MATLAB/Simulink.
- Contributed to a workflow simulation based on timed state transitions for a surgical hand-preparation process.
- Gained practical experience with debugging, embedded software workflows, and collaborative engineering practices.

Police Intendant **2014-2019**

Turkish National Police

- Led teams and coordinated operations in high-pressure environments, strengthening leadership, communication, and decision-making skills.

PROJECTS

MeowMatch

Java • Spring Boot • MongoDB • Docker

GitHub: github.com/Fathkrc/meowmatch

- Developing a Spring Boot backend platform that connects cat owners seeking compatible breeding matches for their cats.
- Designed RESTful APIs for user accounts, cat profiles, and matching workflows following a layered architecture.
- Integrated MongoDB persistence and Dockerized the application for consistent development and deployment.

Library Management System

Java • Kotlin • React • TypeScript

GitHub: github.com/Fathkrc/library-management-system

- Developed a full-stack library management application featuring role-based access control and inventory management.
- Designed backend services and relational database interactions while collaborating in a team environment.

EDUCATION

Hive Helsinki 2026-

- Software Engineering Program (Current)

Tampere University-Certificate Studies in Computing- 2024

- Data Intensive Programming
- Advanced Web Development
- Cloud Services (AWS)

Police Academy, Turkey 2010-2014

- Bachelor’s Degree

LANGUAGES

- English (full Professional fluency)
- Finnish — A2 (actively studying)
- Turkish (Native)
